February 3, 2006

Utah Department of Environmental Quality
 Division of Water Quality
 288 North 1460 West
 Salt Lake City, Utah 84114-4870

Attn: Jeff Studenka - Environmental Scientist

Subj: Completion of Reclamation at the Des Bee Dove Mine Sediment Pond, UPDES Permit
 Number UTG-040022

PacifiCorp, by and through its wholly-owned subsidiary, Energy West Mining Company (Energy West), hereby informs the Division of Water Quality that the Des Bee Dove Mine sediment pond (UTG-040022) and access road has been completely reclaimed. Structures including the dam, oil skimmer, valve, and culverts have been removed from the site. The ephemeral channel that originally existed has been reconstructed to allow free flow of storm water runoff through the area. Sediment control utilized in this reclamation project consists of deep gouging and hydromulching with a tackifier additive. Hydromulch was applied at a rate of 2000 lbs/ac. Tackifier was applied at a rate of 500 lbs/ac.

The said point discharge no longer exists, and therefore, monitoring and reporting of this site will be suspended. Once we, the permittee, receives Phase III Bond Release of the mine site and sediment pond area from the Division of Oil, Gas, and Mining, the Division of Water Quality will be informed so the site can be eliminated from your database.

If you have any questions or concerns regarding this site, please feel free to contact me at (435) 687-4825 or Chuck Semborski at (435) 687-4720.

Sincerely,

Dennis Oakley
